Free Colorectal Cancer Screening

An annual simple test on your stool helps to identify early curable colorectal cancer. Though it is the easiest cancer to detect, it is the top cancer in Singapore, especially among those above 50. If benign growths (colorectal polyps) in the colon/rectum are detected, you can remove them early and prevent colorectal cancer.

Free test kits are now available

All Singaporeans and PRs aged above 50 qualify for a **FREE FOBT (Faecal Occult Blood Test) kit**. Collect your kit and find out how you can do this test in your own home at the following locations:

免费结肠直肠癌检验

每年只需一次简单的检验就可能提早验出早期结肠直肠癌的症状。虽然结肠直肠癌最容易被检测出来,但它仍然是新加坡排名第一的癌症,尤其是五十岁以上的人群。如果检测出良性肿瘤就能尽快切除,预防进一步的扩散。

免费检验配套即可领取

新加坡防癌协会将为50岁以上的新加坡公民和永久居民提供免费结肠直肠癌粪便检验配套。请于以下地点领取:
